3809 SURFACE INSPECTION COMPLIANCE REPORT

Date of Inspection: 7 August 2002

Case Serial No./Name: UTU-068868

Operator: Thirstystone, Tucson, AZ

Project Description: Small Mine Plan-Surface Quarry (picturestone)

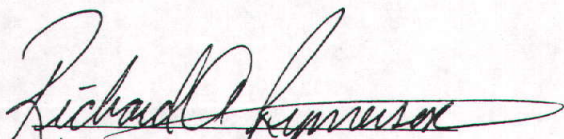

Legal Description: 26 0420S 0140W 018 SW¼

Inspector: Rick Rymerson

REPORT NARRATIVE:

To reach this site, travel north on Telegraph Road, towards the landfill. After turning right from Telegraph Road and reaching the end of the old sand pit, there is a dirt road on the right that leads to the quarry area (see map).

Minimal, if any, change from previous inspection that was completed by Ed Ginouves, CCFO geologist, on 2 August 2001. Boulders marked with red spray paint apparently stockpiled for transfer to processing site in Tucson, the headquarters of Thirstystone. Total disturbance is ~4.5 acres. Gate was broken and allowed public access into quarry area. The public is using the area as shooting range and dump. High-walls are a safety hazard and gate needs to be repaired.

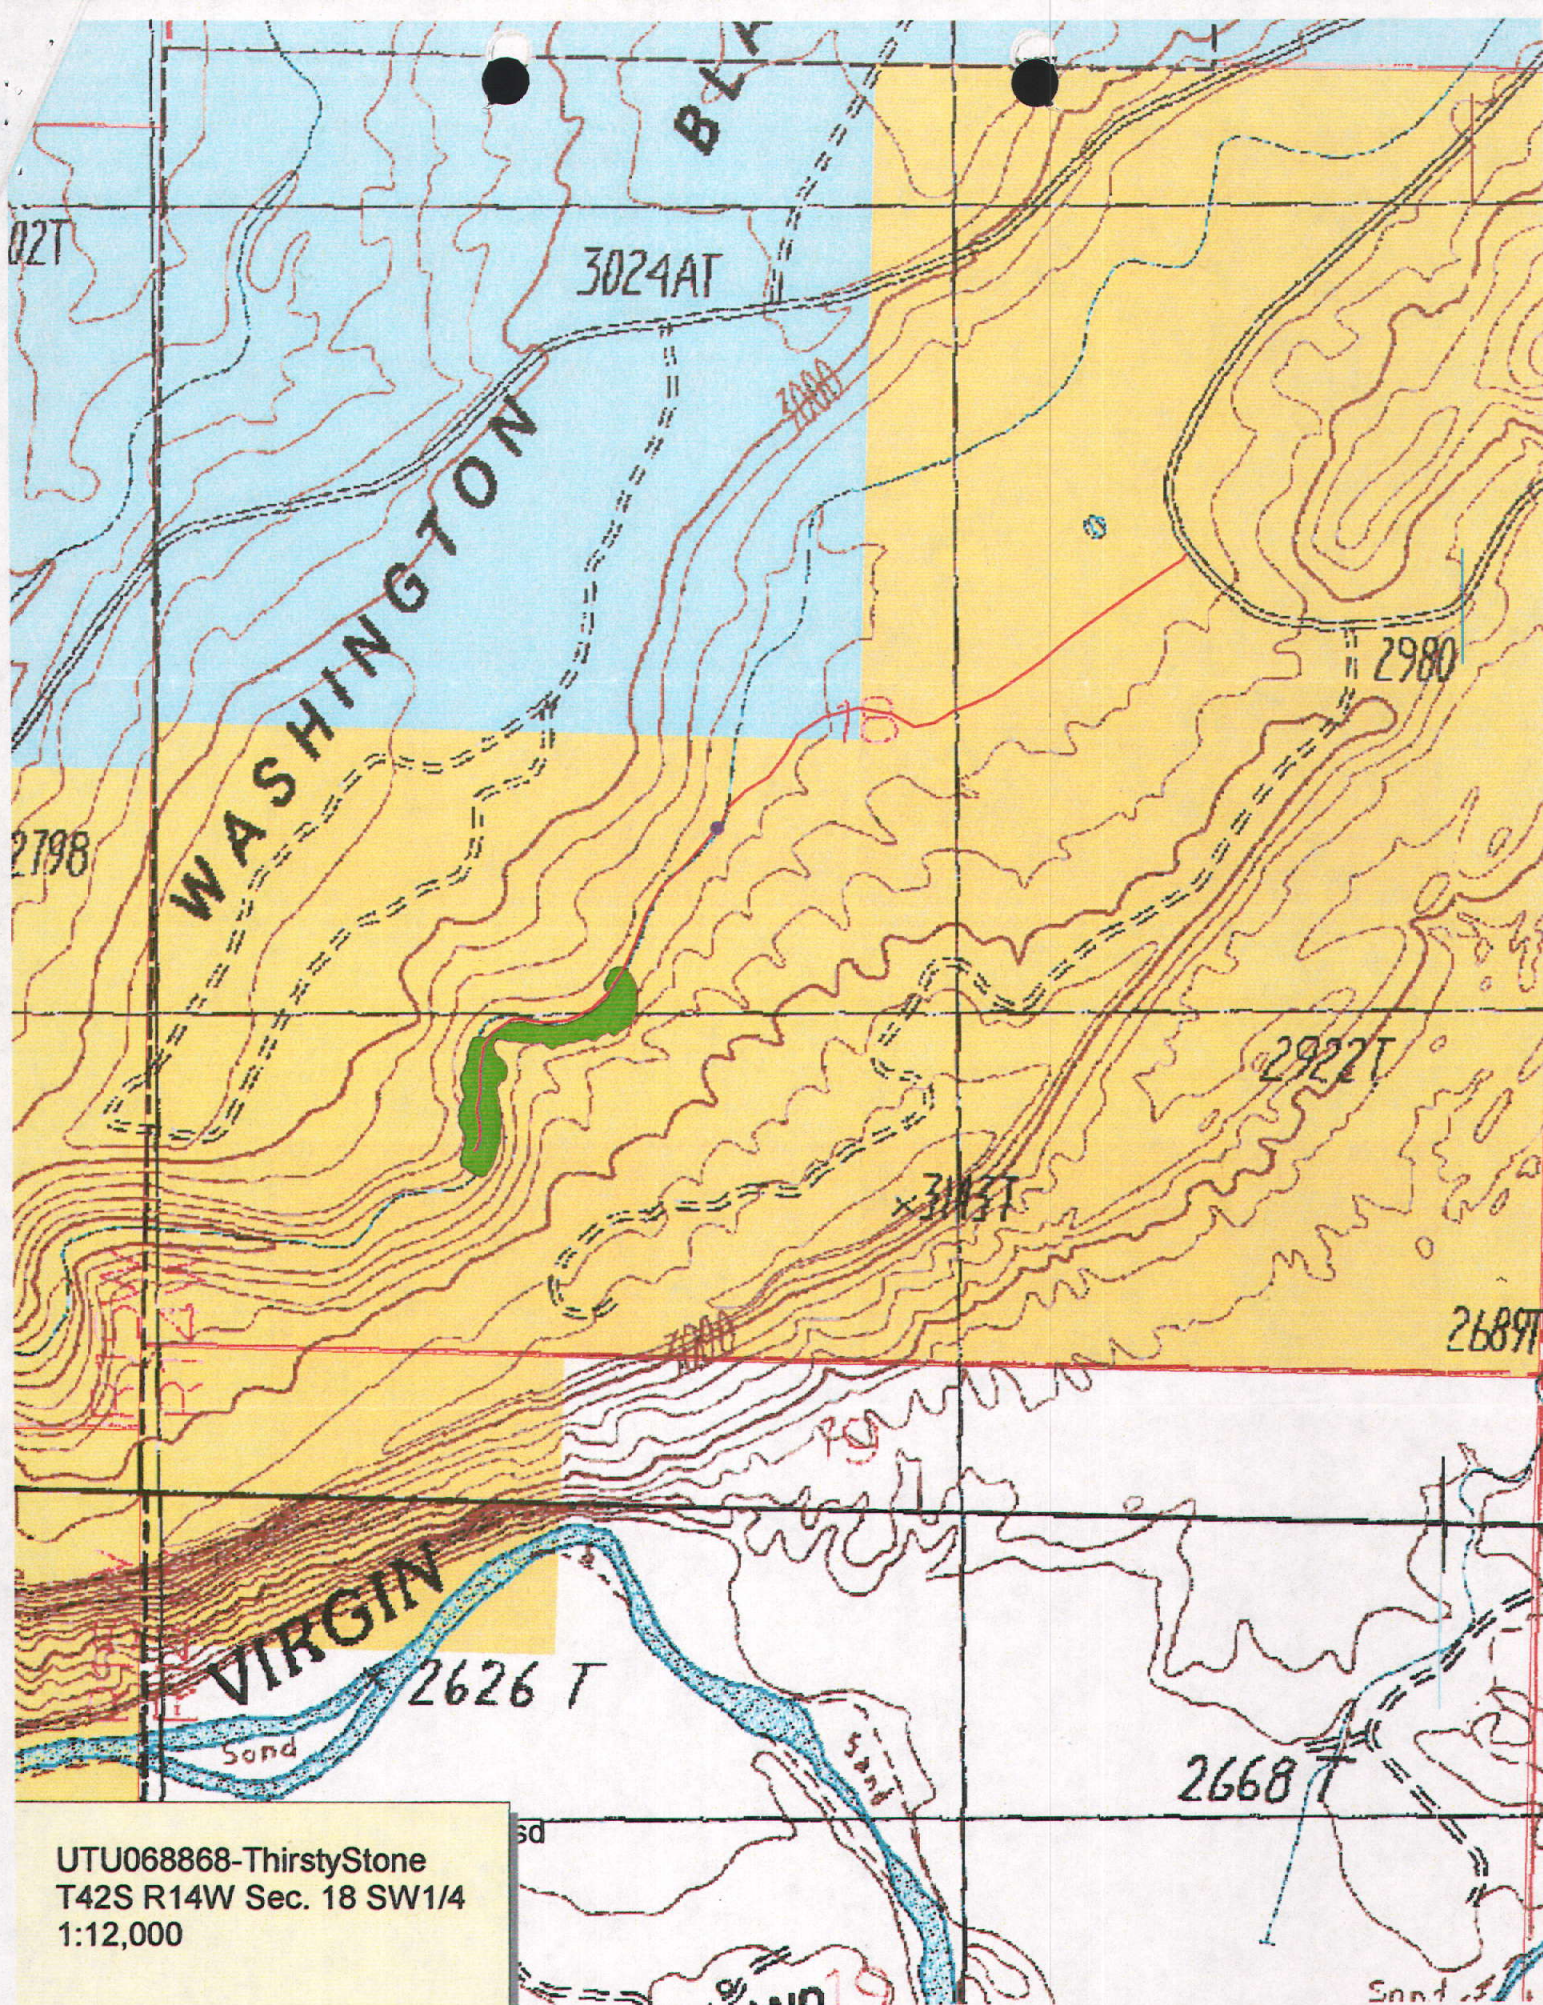

Signature of Inspector

Entered into LR2000 Y/N
